

**42<sup>nd</sup> Mid-Atlantic Macromolecular Crystallography Meeting**

May 31 - June 2, 2012  
University of Virginia  
Charlottesville, VA

The 42<sup>nd</sup> Mid-Atlantic Macromolecular Crystallography Meeting (MAMCM) will be held at the University of Virginia Darden Conference Center in Charlottesville, Virginia, from May 31<sup>st</sup> through June 2<sup>nd</sup>, 2012. The MAMCM serves as a platform for the presentation of the latest research results, technical advances, and as a forum to facilitate discussions amongst structural biologists in the mid-Atlantic region. Registration is now open at <http://www.mid-atlantic.org>.

This year the keynote speaker will be Dr. William Weis from Stanford University School of Medicine. The meeting will also feature two interactive workshops: a Lipidic Cubic Phase (LCP) Crystallization Workshop led by Dr. Vadim Cherezov and Wei Liu of The Scripps Research Institute and a Structure Determination Workshop organized by Drs. Maks Chruszcz and David Cooper of Dr. Wladek Minor's laboratory and featuring Dr. Jim Pflugrath from Rigaku Americas.

Platform presentations will be selected from submitted abstracts. Preference will be given to young researchers (students and postdocs). Two \$250 poster prizes (one for students, one for postdocs) will be awarded.

We have blocked off rooms at several local hotels, as well as conveniently located suites provided by University Housing.

**IMPORTANT: The MAMCM coincides with a reunion weekend at the University of Virginia. Please reserve your accommodations early! Note that most of the blocked rooms will be released on April 30th.**

<http://www.mid-atlantic.org>

Respectfully,  
Drs. David Cooper, Peter Horanyi and Michael Purdy  
Co-Directors of the 42<sup>nd</sup> MAMCM
